EXPERIENCE

PHEME Software Pvt. Ltd

20 Jan. 2026 - 22 May 2026

College Internship

- Developed an AI-powered Visual Search Engine for e-commerce, enabling users to search for products using either images or text.
- Built REST APIs using FastAPI and developed an interactive user interface with Streamlit for image-based product retrieval.
- Implemented visual feature extraction using ResNet50 (PyTorch) to generate high-dimensional image embeddings for similarity matching. Also integrated FAISS for efficient vector similarity search
- Containerized the application using Docker to simplify deployment and ensure a consistent development environment.

WebMobi 360

June 2025 - Sept. 2025

AI ML Engineer Internship

- Developed a content-based travel destination recommendation system using Python, processing 100+ destinations.
- Developed an IMDb movie review sentiment analysis system using Python, NLP, Logistic Regression, and Support Vector Machine (SVM) on 50,000+ movie reviews.
- Compared Logistic Regression and SVM classifiers and achieved approximately 87% sentiment classification accuracy, demonstrating effective binary text classification.

PROJECTS

Task Management System API

- Developed a RESTful task management API using **Java and Spring Boot**
- Implemented CRUD operations for creating, retrieving, updating and deleting tasks
- Integrated Spring Data JPA with a relational database for persistent task storage.
- Learned and applied REST API design, request handling, and backend development, Also Tested REST endpoints using Postman and managing source code using Git and GitHub.

Driver Drowsiness Detection System

- Developed a real-time driver drowsiness detection system using Python and OpenCV, processing live webcam footage at approximately 25 -30 FPS.
- Implemented facial feature analysis using Eye Aspect Ratio (EAR) and Mouth Aspect Ratio (MAR) to detect prolonged eye closure and yawning.
- Implemented an automated audible alarm and on-screen warning system with an estimated 90% + detection accuracy during controlled testing.

EDUCATION

UPES

June 2024 – May 2026

Masters in Computer Applications with specialization in AI and Machine Learning

Dehradun, U.K.

Christ College

Apr. 2021 – June 2023

Bachelor of Science (Computer Science)

Pune, M.H.

SKILLS

Languages : Python, Java, HTML, CSS, SQL

Frameworks : Tensorflow, Pytorch, Spring Boot, Spring data JPA ,REST APIs

Tools : IntelliJ IDEA, Git, GitHub, Docker, Jupyter Notebook
